

Sayak Sen

Automation Engineer | Python Automation | Playwright | Guidewire QA | GCP | Oracle | Informatica/IICS
Bengaluru, Karnataka, India | +91 6290890754 | ssayak02@gmail.com | linkedin.com/in/sayak--sen/ | GitHub

PROFESSIONAL SUMMARY

Automation Engineer with 2+ years of hands-on experience designing and executing end-to-end test life cycles across Guidewire PolicyCenter / ClaimCenter, GCP and Oracle DB. Delivered 100% SLA compliance and zero P0 defects in production across all release cycles. Proficient in Python/Playwright automation, CI/CD pipeline integration, REST API validation, cloud data migration testing, and stakeholder quality dashboards.

TECHNICAL SKILLS

Test Automation: Playwright, Python, PyTest, TypeScript, Codegen, PySpark, Apache
Cloud & Databases: GCP (BigQuery, Cloud SQL), Oracle DB, DBeaver, SQL Optimisation
API & Backend: REST API Validation, Source-to-Target Reconciliation, Postman, EchoAPI
ETL & Pipelines: Informatica IICS, ETL Monitoring & Optimisation
Domain: Guidewire PolicyCenter & ClaimCenter — Functional, Regression, UAT
DevOps & Tools: Git, JIRA, CI/CD, Allure Reporting, Agile/Scrum
AI & GenAI: GitHub Copilot, ChatGPT/LLMs — Rapid Prototyping, Test Case Generation
Programming: Python, SQL, TypeScript, JavaScript, Java (OOP/DSA)

PROFESSIONAL EXPERIENCE

Altimetrik India

Automation Engineer — Testing

Jun 2025 – Present

Bengaluru, KA

- **Achieved 100% SLA compliance and zero production rollbacks** by designing and executing 150+ Playwright/Python test cases across Guidewire PolicyCenter and ClaimCenter insurance workflows, covering functional, regression
- **Reduced backend data defect leakage to zero** across all pre- and post-deployment verification cycles by implementing a multi-source validation framework spanning GCP (BigQuery, Cloud SQL), Oracle DB, and DBeaver.
- **Maintained 100% on-time delivery and zero stakeholder complaints** by authoring test plans, leading peer reviews, and publishing release-gate quality dashboards at every sprint cycle end.

SLK Software Services Pvt. Ltd.

QA Engineer / SDET

Jun 2024 – Jun 2025

Bengaluru, KA

- **Reduced manual regression effort by ~60%** and enabled consistent weekly release cadence by architecting end-to-end automated test suites in Python, TypeScript, and Playwright across 3 enterprise Guidewire insurance platforms.
- **Compressed a multi-week cross-cloud validation effort to days — a ~90% acceleration** by leveraging GitHub Copilot, LLMs, and Model-Based Testing to build a GCP ↔ Oracle data validation framework.
- **Maintained a zero Po-defect-in-production record across 10+ Guidewire deployments** by owning end-to-end defect triage, replication documentation, and root-cause analysis for PolicyCenter and ClaimCenter releases.
- **Ensured 100% data integrity compliance pre- and post-deployment** by building source-to-target reconciliation pipelines that validated 500+ tables and 1M+ records across GCP, Oracle DB, and DBeaver.
- **Reduced QA cycle time by 50–60%** by developing TypeScript + Playwright GUI automation suites for Planview Portfolios with cross-browser coverage, fully integrated into CI/CD for nightly regression runs.

KEY PROJECTS & ACHIEVEMENTS

TAP Migration — Guidewire & Cloud Data Migration |

Python, Playwright, Oracle, Informatica IICS, GCP, BigQuery, SQL

- **Reduced manual validation effort by ~75% and compressed sign-off time from 3 days to under 4 hours** by building Python reconciliation scripts validating data integrity across 10+ domains, 500+ tables, and 1M+ records during Oracle-to-GCP migration.
- **Improved ETL pipeline reliability by ~30% and execution performance by ~30%** by designing, monitoring, and SQL-optimising 15+ Informatica IICS transformation pipelines.

ClaimCenter Migration — CI/CD-Integrated Regression Framework |

Python, CI/CD, Allure Reporting, BigQuery, Cloud SQL, Oracle DB

- **Reduced regression cycle time by ~40%** by designing a scalable CI/CD regression framework with Allure dashboards enabling nightly automated runs.
- **Compressed story completion from 5 days to under 24 hours** by automating 100% of previously manual Guidewire ClaimCenter workflows.

Guidewire Regression Suite — PolicyCenter & ClaimCenter | *Python, Playwright, TypeScript*

- **Eliminated post-production defect leakage and improved release confidence across all sprints** by creating and maintaining 1,000+ automated regression test cases for Guidewire PolicyCenter and ClaimCenter.

EDUCATION

Narula Institute of Technology

B.Tech in Computer Science

Jul 2020 – Jul 2024

West Bengal

National English School

Science with Maths

Apr 2018 – Apr 2020

West Bengal

Calcutta Boys' School

Secondary Education

West Bengal
